

AGRI-PLASTICS

The Calf Housing Specialist

Product Catalog

AGRI-PLASTICS HISTORY

The two owners of Agri-Plastics Darren and Rob VanBuuren are third generation dairy farmers. "We've been in the calf housing industry since 1995 and have grown to become one of the largest manufacturers of calf raising products in the market today."

"Growing up on a dairy farm we knew that it was very important to have labour efficiencies and products that are built to perform and raise healthy calves. We believe that we need to listen to our customers as they are the ones using these products on a day to day basis."

"In 1999 we introduced the first ever rear feeding, bedding, and ventilation door which is now an industry standard, then in 2011 we invented the first ever one piece Group Hutch with a Swing Up Rear Bedding Door, yet another industry first. New for 2014, we have the Bottom Air Flow Vents that are a new standard on our Calf Hutches. We keep continuing to create new innovations for you. In 2015 we came out with our Starter Pen and for 2016 we have the brand new Flex-Pen System."

"Throughout the years in business we have changed out designs as we will continue to improve things and add new features. Innovation is what drives our industry! Our sales staff are also from the dairy industry and are able to help you with all your calf raising concerns. They can help you find the solutions you need to raise healthy calves."

CUSTOMER TESTIMONIALS

"We selected Agri-Plastics for our new expansion at Milk Source. Agri-Plastics was the best choice for us because of their well renowned, superior ventilation, durability and features"

-Ermith Ocampo Milk Source

"We have been using Agri-Plastics Calf Hutches for over 10 years. When it was time to expand our calf operation, we also expanded with Agri-Plastics Group Hutches, they were modified to our needs, with a new swing up rear bedding door, which saves us time when bedding calves. We proudly can say that Agri-Plastics Group Hutches met our expectations and they provide a healthy environment for the calves to continue their maximum performances."

-Henry and Rose Keunen, Henro Dairy Farms, Ontario, Canada

"We really like how Agri-Plastics Indoor Calf Pens stay straight [and] clean. We are very impressed at how much thought has been put into them to make them user friendly. Also, the bottle holders work great."

-Mike Harris, Harris Dairy Land, Richmond, Utah

"We looked at different brands of calf hutches. We chose the Agri-Plastics EXL Hutch because of its durability and the 3 in 1 rear door and the side feeder door makes it easy to work with!"

-Mark Van Raalte, Kopepon Holding, Feerwerd, Netherlands

"We really like Agri-Plastics Calf Hutches. They are built to take abuse [and] the calf has a lot of room inside. The storm door option is wonderful as we live in Iowa and our winters can have a lot of snow. These doors keep the calf hutch warm and dry"

-Evan Bleyenbergh, Sioux Center, IA

"We love Agri-Plastics hutches, with the swing up rear door [they're] great for ventilation bedding and checking on calves"

-Gloria Whitten, Vally Mound Farms, Scipio NY

FOCUS ON FIVE

Why do we call ourselves The Calf Housing Specialists? Because we are farmers, working with other farmers to come up with innovative products for the market. Our focus is on these key items when coming up with new ideas and products: Ventilation, Bedding, Temperature, Feeding, and Management. Agri-Plastics is the choice you should make when upgrading, or starting a new farm to reduce your calf mortality rate.

1. VENTILATION

In order for a calf to thrive a calf must have fresh clean air that is low in ammonia. With an Agri-Plastics calf housing product this is possible. Because there is no stale air. With the square design, rather than the tapered design of most other hutches, there is more air flow and shoulder room for the calf which provides comfort and space.

2. BEDDING

Bedding is another main focus of ours. Bedding provides comfort and cleanliness for the calf. With the 3-In-One Rear Bedding Door, standard on all hutches this is possible. The 3-In-One Doors allow you to gain access to the rear of the hutch to change the bedding and provides optimal ventilation for your calf. It also provides an additional observation point when checking on your calf.

3. TEMPERATURE

In all Agri-Plastics calf housing products, the temperature is always comfortable. We have designed our products with the calves in mind. There is plenty of air flow in our hutches and pens, allowing the temperature to be at a consistent rate all the time.

4. FEEDING

Agri-Plastics has thought of everything right down to feeding. Feeding has to be the most important focus. Agri-Plastics has come up with products to help you feed calves from colostrum to concentrate. Our bucket holders come with a splash guard to help prevent cross contamination of your calves' food. We also offer weather covers for outside feeding areas. This is all to promote healthy feeding for your calf.

5. MANAGEMENT

Now, we can't do everything for you, so this is where you come in! With proper management, systems and procedures in place, along with the correct facilities and equipment to implement the other key points above, you will have a sustaining farm that will last and grow!

CALF HUTCHES

Seeing things in our daily routines and through talking to other farmers we found the need to supply the farming community with a line of products that are built to last, saves time and improves the health of the livestock.

Our Calf Hutches answered that need.

Built tough enough to handle the most demanding operations, and backed by a 10 year limited warranty, a Calf Hutch from Agri-Plastics is the number one choice of farmers worldwide.

AGRI-PLASTICS
The Calf Housing Specialist

3-IN-ONE REAR DOOR

What sets our innovative rear feeder apart from other systems on the market?

The only rear door that does three things: ventilation, bedding and the option to rear feed. Agri-Plastics 3-in-One Rear Door also has a built in leaning ledge for easy cleaning. This prevents the hutch from falling over when pressure washing. Only one person required.

BOTTOM AIR FLOW VENTS

Bottom Air Flow Vents, another industry first from Agri-Plastics. These vents allow fresh air to flow along the bottom, reducing the smell of ammonia and keeping your calves' health a top priority.

STAY OPEN DOOR

The Stay Open Door locks into place so the wind cannot blow it closed.

MANGER & BUCKETS

The Manger and buckets located on the inside or mounted outside on a fence.

HEAVY GAUGE

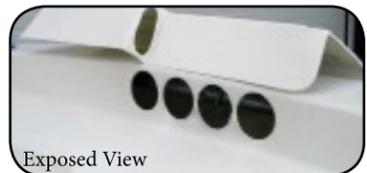

Molded from heavy gauge plastic. There is no need for a steel frame that will rust out.

ROOF VENTILATION

Protects the calf from the rain and snow coming in through the top, and also is used to let more fresh air in.

Opens and Closes

Exposed View

OTHER GREAT FEATURES

- Manger has built in splash guard to prevent cross contamination.
- White bucket: Calf stater usage will begin in 1-2 days vs 4 days for black buckets.
- Two rugged poly buckets.
- Mangers come with bucket stoppers, prevents buckets from getting knocked out.
- Completely opaque.
- Left or Right offset door or full cut out for warmer climates. (SL Hutch)
- All doors have a stay open feature that locks into place.
- Choice of left or right side door with deluxe models.

CALF HUTCH LINE UP

SPACE SAVER CALF HUTCH

AGRI-5001

Agri-Plastics newest Calf Hutch to date. The new Space Saver Hutch is perfect for smaller sized calves or shorter growth periods. Includes Top Roof Vent, Rear 3-in-One Door, and Bottom Air Flow Vents.

SSL CALF HUTCH		
DIMENSIONS	IMPERIAL	METRIC
SSL Outside Dimensions	61" L x 45.5" W x 47" H	155cm L x 115.5cm W x 119cm H
SSL Inside Dimensions	57" L x 41.5" W x 42" L	145cm L x 105cm W x 107cm H
SSL Weight	55 lbs	25 kg

DELUXE SL CALF HUTCH (STANDARD LENGTH)

AGRI-2016

Agri-Plastics SL Calf Hutch is used for standard growth periods 6-8 weeks of age. This hutch is very popular when calves are weaned up to 8 weeks of age. Options for feeding include side and rear feeding, two buckets, manger, Top Vent, Rear 3-in-One Door, and Bottom Air Flow Vents.

SL CALF HUTCH		
DIMENSIONS	IMPERIAL	METRIC

ACCESSORIES

4-IN-ONE SUPREME FENCE AGRI-1800

A unique sliding fence system that allows you to keep the calf inside when you are cleaning the outside pen area. The swivel wheels allow you to transport the hutch with ease. Simply flip up the hutch and go!

CALF FENCE PANEL
Made from 1/4" diameter hot dipped galvanized steel.
42" H x 72"D x 48"W

CALF FENCE PANEL - CUT
Cut out for feed buckets.
42" H x 72"D x 48" H

WEATHER COVER
Protects feed from the elements.

FENCE ATTACHMENT HARDWARE

TETHER BAR KIT
Includes metal bar/neck strap/chain/eye bolts for mounting.

FRONT PLASTICS PIPES
Plastic pipes to keep calves inside.

FRONT FEEDING DOOR
Feeding from the front of the hutch when the weather is bad.

FENCE MOUNT BOTTLE HOLDER
AGRI-2003
Fits 2 or 3 quart bottle.

SL BOTTLE HOLDER
AGRI-2002
Fits 2 or 3 quart bottle.

BOTTLE
AGRI-1070
AGRI-1071
2 or 3 quart bottle with soft with rubber nipples.

TEAT BUCKET
AGRI-3009
Includes nipple and mounting bracket.
(Optional weather cover)

EARLY STARTER BOWL
AGRI-1067
4" Starter Bowl, much faster calf starter intake. For use in the first 2 weeks.

HAY FEEDER
AGRI-2052
Hangs on the inside of the hutch and includes a side access door for easy feeding.

SNAP IN STORM DOOR
AGRI-2062
Protects calves from the elements.

HINGE STORM DOOR
AGRI-2063
The storm door will stay open against the wire fence.
(Only for SL model)

HANGING FENCE FEEDER
AGRI-1132
Holds enough calf feed for 3 days, and it mounts to our wire fence. Has a hinged cover.

CALF JACKET
300.0632
With quick release buckles.

INFO STICKERS
AGRI-7026
Comes in rolls of 250 and can be used to ID your hutch and calf.

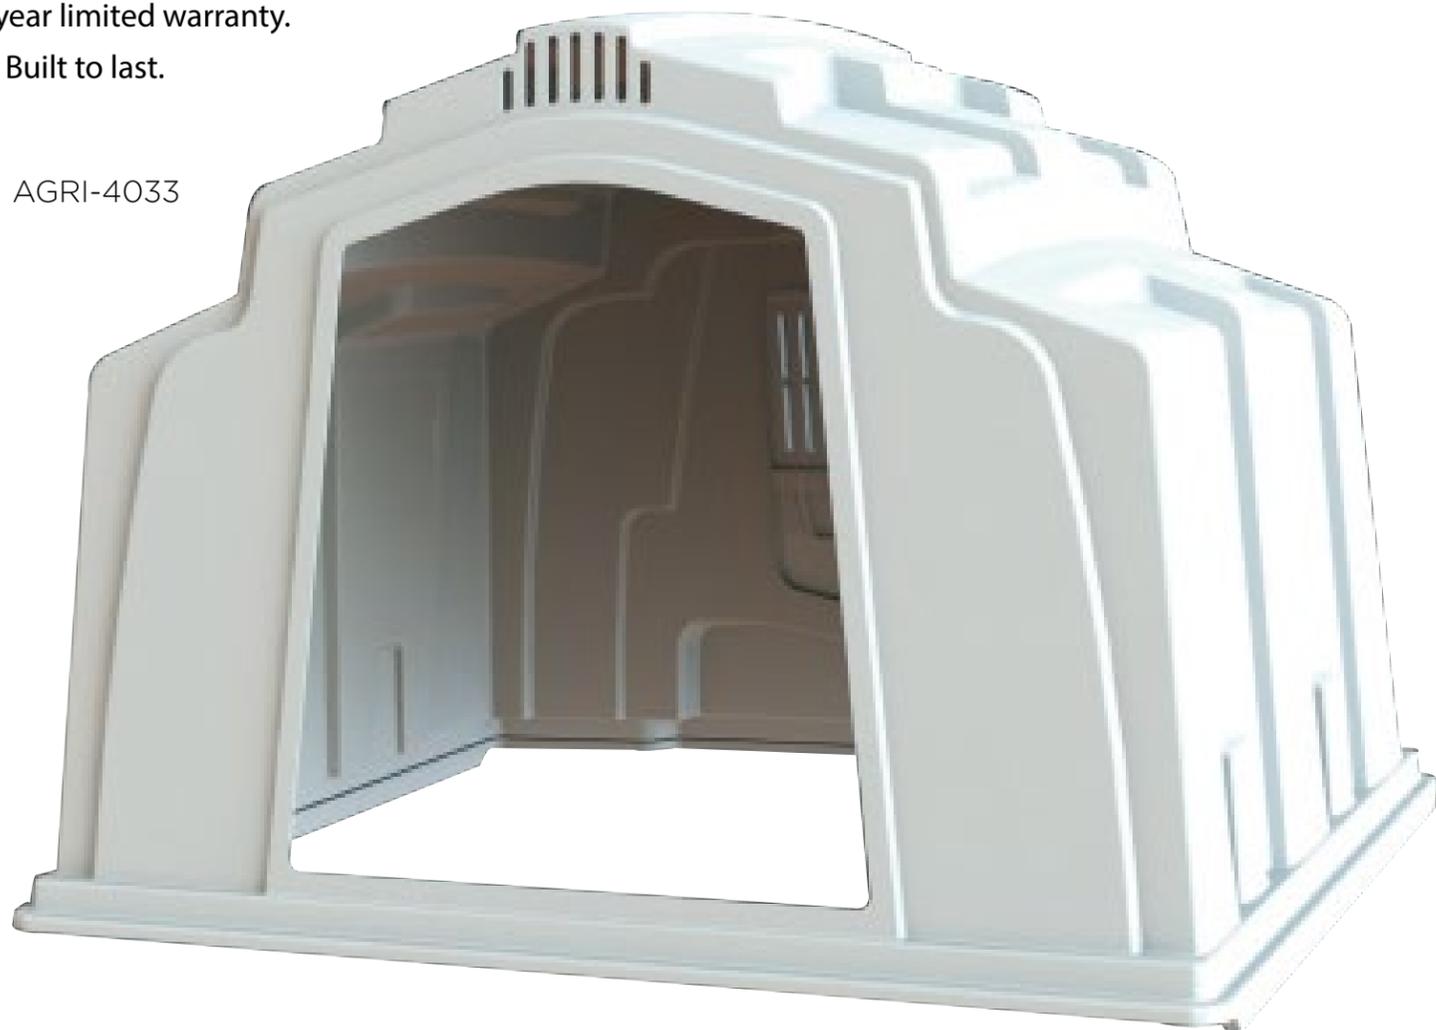

GROUP HUTCH

When calves are raised in calf hutches, and then after weaning, are placed with a large group it can cause much stress on the calf. By transitioning weaned calves into an Agri-Plastics Group Hutch you will eliminate the competition for food and water, and the calf will adapt to being with others. Every Agri-Plastics Group Hutch is built to last. Ours is a thick-walled unit backed by a 10 year limited warranty.

Built to last.

AGRI-4033

GROUP HUTCH		
DIMENSIONS	IMPERIAL	METRIC
Outside Dimensions	89" L x 106" W x 79" H	226cm L x 269cm W x 200cm H
Inside Dimensions	81" L x 100" W x 75" H	206cm L x 254cm W x 191cm H
Weight	250 lbs	113 kg

SWING UP REAR BEDDING DOOR

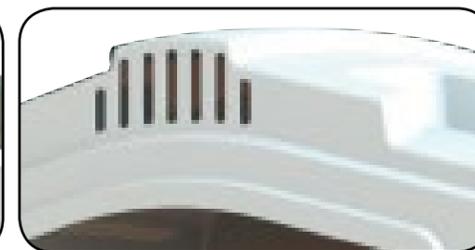

What sets Agri-Plastics innovative Swing Up Rear Bedding Door apart from the rest?

The Swing Up Rear Bedding Door allows you to gain easy access to add bedding safely to the Group Hutch saving you time and money. This can be done by machine or by hand. Also we have designed integrated grill vents into the back doors for ventilation. There is a Swing Up Bedding Bar which enables you to keep the doors in the raised position providing optimal ventilation.

RIDGE VENTILATION

With a Grill Vent in the front and a Rear Top Rotary Vent you can control the air flow.

MOLDED IN ONE PIECE

For superior strength with no rivets to break loose.

INTEGRATED POLY SKID

Will not freeze to the ground like a wooden skid.

OTHER GREAT FEATURES

- Swing-Up-Rear large bedding door with integrated rear grill vent.
- Molded in one piece for superior strength.
- Front ridge top roof vent, rear rotary top vent.
- Extra hutch height for longer growth periods.
- Integrated poly skid - will not freeze to the ground like wood skids.
- Truly opaque.
- 10 year limited warranty.

ROLLING GROUP FEEDING PEN

The Rolling Group Feeding Pen is the newest addition to the Agri-Plastics Group Hutch line. With the ease of the rolling fence, cleaning time is cut down and not as much labour is required.

Ensemble de clôture sur roues

ROLLING GROUP FEEDING PEN SYSTEM

- Pen rolls back and forth making cleaning time efficient and easy.
- Side panels are made from aluminum.
- 3 troughs included.
- Optional Milk Bar available.
- 108" (274cm) Wide.
- 96" (243cm) Long.
- Recommended for calves from 2 - 10 weeks of age.

OPTIONS

Water bucket not included

TRANSITION PEN SYSTEM STANDARD SIZE

- Side panels are made from aluminum.
- Sealed plastic feed trough reduces feed waste and saves costs.
- Corners simply pin together. Moving or disassembling out group transition pen is quick and easy.
- 192" (488cm) Wide.
- 108" (274cm) Long.
- Recommended for weaning up to 20 weeks of age.
- Side Water Hole.

Water bucket not included

XL TRANSITION PEN SYSTEM

- Side panels are made from aluminum.
- Sealed plastic feed trough reduces feed waste and saves costs.
- Corners simply pin together. Moving or disassembling out group transition pen is quick and easy.
- 192" (488cm) Wide.
- 138" (351cm) Long.
- Recommended for weaning up to 20 weeks of age.
- Front Water Hole.

MB6

- ### MILK BAR
- Holds up to 36L
 - Fitted with milk bar teats for great calf health.

AGRI-4034

- ### GROUP HUTCH LIFT KIT
- Makes moving hutches a one person job.
 - Top entry point swivels for either side or end lifting.
 - Works with skid fork or bale spear.

300.0632

- ### CALF JACKET
- Most beneficial for calves that are less than 4 weeks.
 - Reduces risk of illness.
 - Helps maintain calf's weight during the cold winter months.

AGRI-7026

- Comes in rolls of 250 and can be used to organize your heard.

STARTER PEN

The New Starter Pen from Agri-Plastics is designed for getting your calves off to a healthy start. These Starter Pens are designed for short term use, before moving your calves to your Calf Hutches / larger Indoor Pens / Group Hutches or Robotic Feeding.

With the Agri-Plastics Starter Pen, you can better manage your calves health as you are able to teach your calf to drink properly and make sure it is off to a healthy start. Our new Starter Pens are manufactured from the same material as our other proven products. These units are easy to clean and are very labour efficient. We offer three different styles that will suit your operation.

- 10 year limited warranty

STARTER PEN

The Starter Pen sits directly on the ground and can be placed in a building or outside under an over hang. These units come with the Front Feeding Door.

Optional: Bottle Holder, Milk Bottle, Teat Bucket, Pail Ring, Starter Bowl, Attachment Kits, and Bucket.

MODEL	DIMENSIONS (IN.)	DIMENSIONS (CM)
OUTSIDE	40"W x 51.5"L x 42.5"H	102 cm x 131 cm x 108 cm
INSIDE	34.5"W x 47"L x 42"H	88 cm x 120 cm x 106 cm

ELEVATED STARTER PEN

The Elevated Starter Pen has a molded slatted floor that is elevated off the ground with galvanized metal legs for optimal drainage. It also comes with our standard Top and Bottom Air Flow Vents and your choice of Bottle Front Feeding door or Teat Bucket Front Feeding Door. Two units can be attached together with the optional connecting bracket kit. These units are designed to be easily cleaned and moved. These can be placed in a building or outside under an over hang.

Optional: Bottle Holder, Milk Bottle, Starter Bowl, Teat Bucket, Pail Ring, Starter Bowl, Attachment Kits, and Bucket.

MODEL	DIMENSIONS (IN.)	DIMENSIONS (CM)
OUTSIDE	40"W x 51.5"L x 42.5"H	102 cm x 131 cm x 108 cm
INSIDE	34.5"W x 47"L x 42"H	88 cm x 120 cm x 106 cm
SLATTED FLOOR OUTSIDE DIMENSIONS	42"W x 55"L x 9.25"H	106 cm x 140 cm x 23 cm

MOVABLE STARTER PEN

The Movable Starter Pen includes 4 wheels, two swivel wheels with brakes and two rigid wheels that are mounted directly to the molded slatted floor. It also comes with our standard Top and Bottom Air Flow Vents and your choice of Bottle Front Feeding door or Teat Bucket Front Feeding Door. The units are designed to be easily cleaned and wheeled around the farm. These can be placed in a building or outside under an over hang.

Optional: Bottle Holder, Milk Bottle, Teat Bucket, Pail Ring, Starter Bowl, and Bucket.

SLATTED FLOOR OUTSIDE DIMENSIONS	42"W x 55"L x 9.25"H	106 cm x 140 cm x 23 cm

This new stand-alone Flex-Pen system has detachable side panels so that calves can be grouped or housed separately for health or welfare reasons. It has multiple "flexible" setup configurations and can be extended to any length the customer wishes.

Currently, there are no stand-alone pen systems in the market with a detachable side panel to transform from single to group housing. Furthermore, there are no stand-alone pen systems where the front feeding door and the rear door can be interchanged if desired.

Now calves can be housed individually to start and then grouped when required without the need for undue stress on the calf or the operator.

AGRI-7006

AGRI-7005

SLIDE 'N' GO

It is the only single indoor pen system to transform into small Group Housing!
 This is achieved by the unique Lock Block and Centre Panel combination. Simply flip the Lock Block up on both ends to slide out the Centre panel. Then place the Lock Block back down and add the optional Group Housing Bar. This will then allow the two calves to interact with one another.

LOCK BLOCK

This is what gives the Flex-Pen its uniqueness. It is the lock that holds everything in place and lets you configure the pen into group housing.

SLAM LATCH

An efficient locking mechanism that is easy to use and keeps the calf safe.

CALF DIVIDERS

Molded in calf dividers prevent calves from cross suckling which will prevent the spread of disease.

REAR BEDDING

These doors can be opened for easy bedding and used as another access point.

OTHER FLEXIBLE FEATURES

- Adjustable bucket heights
- Optional Wire Bottle Holder or optional Teat Bucket.
- Flex-Pen is also designed for the European housing standards with molded through side windows.
- Rear Bedding access
- Reinforced steel frame inside the front panel
- Interchangeable front and rear doors
- Efficient calf viewing
- Easy to clean and lightweight
- Molded from heavy gauge plastic
- Units can also be wall mounted with optional wall bracket.
- Compatible with robotic feeding

HAY FEEDER
Galvanized double sided hay feeder.

CALF JACKET

WALL BRACKET
Galvanized wall bracket for mounting to wall.

QUICK RELEASE WIRE BOTTLE HOLDER
Easy to take on and off for cleaning.

2 OR 3 QUART BOTTLE

GROUP HOUSING BAR
Used when the Centre Panel is removed.

AGRI-PLASTICS
The Calf Housing Specialist

ADJUSTABLE FRONT DOOR

Front door can be adjusted as your calf grows for optimal calf comfort and development.

DROP-IN-GO PEN SYSTEM

The Drop-In-Go Pen system offers quick and easy assembly and disassembly for cleaning and moving units. These units can also be mounted back to back.

CALF DIVIDERS

Molded in calf dividers prevent calves from cross suckling which will prevent the spread of disease.

STEEL FRAME

Heavy duty front feeding door is reinforced with a steel frame.

REAR ROTARY VENTS

OTHER GREAT FEATURES

- Unique interlocking tongue in groove system makes for quick and easy assembling
- Easy to clean and lightweight
- The fastening system also allows you to dismantle units in minutes
- Does not promote the growth of bacteria or spread disease
- Pin holder storage - "No more dropped pins"
- Adjustable door
- Separate water and feed buckets, prevents food contamination
- Rear rotary vents on free standing models

INDOOR CALF RAISING PENS

DROP-IN-GO WIRE BACK PEN

Agri-Plastics Drop-in-Go wire back pen system, has the most airflow of any Wire Back Pen System on the market. It is quickly becoming a very popular model.

The wire back features a galvanized poly coated wire panel. This system is best utilized in buildings with insufficient ventilation. Opening the rear panel of the calf pen enables better airflow for the calves environment. Also, with the Wire Back Pen System, bedding from the rear can be done with ease and no obstructions.

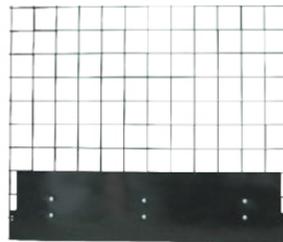

EURO MODEL

Drop-In-Go Pen System has been designed for European standards.

BEDDING STOPPER

This optional product by Agri-Plastics is designed to help contain the bedding inside the wire back hutch.

CALF DIVIDERS

Molded in calf dividers prevents calves from cross suckling which will prevent the spread of disease.
