

SHERICER YOUR INVESTMENT

GROWTH BEGINS HERE *PRODUCT CATALOG*

THERE'S A HISTORY BEHIND OUR PRODUCTS.

The VanBuurens know first-hand the challenges involved in raising healthy dairy calves. As third-generation dairymen they began experimenting with hutch designs to provide a healthier, more comfortable environment for calves while improving efficiencies for their business. In 1995, they founded Agri-Plastics to provide local dairy farmers with a better option for housing and caring for the next generation of milkers.

Over the years, Agri-Plastics listened and learned as other producers talked about their own calf housing challenges. And they responded with game-changing innovations that have since become industry standards.

Today, Agri-Plastics hutches are prized the world over for their unique durability, efficiency and ease of use. But at the heart of it all is a family true to its roots, delivering proven calf housing systems for dairy farmers, by dairy farmers.

We understand the value of your calves, and we're dedicated to helping you shelter your investment.

Rob and Darren VanBuuren

DESIGNED FOR FARMERS, BY FARMERS

REDUCED CALF MORTALITY THROUGH FOCUS ON 5.

Agri-Plastics seeks to maximize animal welfare by focusing on 5 life-sustaining attributes of good calf housing. By developing our hutches with these attributes in mind, we are helping you improve the way you dairy.

Why grow your business with Agri-Plastics?

ENGINEERED FOR DURABILITY.

Rugged Agri-Plastics products are uniquely manufactured to withstand punishing weather extremes along with everyday wear and tear, calf after calf, year after year. The 10-year warranty on our calf hutches is proof of our commitment to durability.

EASIER ON CALVES, CREW AND YOU.

Because life on a dairy is rough enough, Agri-Plastics calf hutches are designed for maximum simplicity and ease of use at every stage, from assembling to cleaning. See pages 14-15 for our exclusive "Slide 'n' Go" Flex-Pen feature!

> "We selected Agri-Plastics for our new expansion at Milk Source. Agri-Plastics was the BEST CHOICE for us because of their well renowned superior ventilation, durability and features." -Ermith Ocampo, Milk Source

VENTILATION

Agri-Plastics calf housing products are designed to maximize fresh airflow while minimizing ammonia for improved calf health and comfort.

2

BEDDING

Your calves enjoy a cleaner, healthier environment, thanks to our unique bedding doors which enable quick and easy access for bedding.

TEMPERATURE

In all Agri-Plastics calf housing products, the temperature is always comfortable. We have designed our products with the calves in mind. There is plenty of airflow in our hutches and pens, allowing the temperature to be at a consistent rate all the time.

A FEEDING

Agri-Plastics calf products are engineered to optimize food intake and safety, from colostrum to concentrate.

MANAGEMENT

When you're backed by The Calf Housing Specialist, managing your investment is easier and more cost-effective than ever!

CALF HOUSING SELECTION GUIDE

Our hutches are built to last, while saving you time and maintaining herd health. Our innovations are based on our own experiences raising calves and decades of experience in calf rearing.

Climate Control

Whether you live in extreme heat or bitter cold, your particular climate will affect which features matter most to you and your calves' health. That's why Agri-Plastics offers hutches with right or left offset doors or full openings to accommodate varying climates.

Built for Your Operation

At Agri-Plastics, we understand that calf housing is never "One Size Fits All." What works for a small dairy most likely will not work for a large operation, so we offer a variety of options and sizes to make sure you can find the best fit for your operation.

HOUSING OPTIONS

Regardless of your facility's setup and calf needs, Agri-Plastics has the solutions to shelter your investment.

STARTER PEN

Set directly on the ground or use our optional Elevated or Movable Starter Pens.

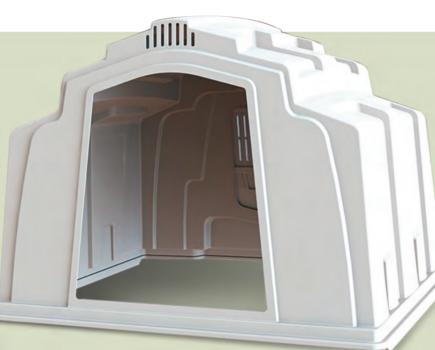

FLEX-PEN

This innovative solution to calf housing allows calves to be housed individually or grouped together via the easily detachable center panel.

Find the right Agri-Plastics product for your operation.

CALF HUTCH

The Deluxe SSL Space Saver Calf Hutch works well for shorter periods of time or smaller calves. Facilitates airflow, comfort and cleanliness.

For standard growth periods of 6 to 8 weeks of age, turn to the Deluxe SL Standard Length Calf Hutch. Most popular for weaned calves up to 8 weeks. Choose between side or rear feeding options.

The Deluxe EXL Extra-Large Calf Hutch accommodates longer growth periods of 8 to 12 weeks of age. The rear of the hutch stays dryer and warmer on cool days, providing better protection from wind, rain and snow.

Deluxe SL Calf Hutch

Deluxe EXL Calf Hutch

GROUP HUTCH

calf stress.

Ease your calves' transition from hutches to group housing by using our group hutches. Helps reduce

Deluxe SSL Space Saver Calf Hutch

CALF HUTCH* SELECTION GUIDE

STANDARD FEATURES

Our Rugged Calf Hutches

are engineered to not only shelter your livestock, but to dependably serve you, even after years of rough daily use. Choose from three models – the Deluxe SSL, Deluxe SL and Deluxe EXL – each available either on its own or as part of a complete Calf Rancher System. All systems come ready to use with airflow vents, 3-In-One rear door, outside feeding station, two poly buckets and a galvanized wire fence. It's no wonder our hutches and systems are used by some of the world's largest farms to shelter, protect and grow their investments.

STAY-OPEN DOOR

MANGER & BUCKETS

Agri-Plastics Calf Hutches are built tough enough to handle the most demanding operations.

The only rear door that does three things: ventilation, bedding and the option to rear feed. Agri-Plastics 3-In-One Rear Door also has a built-in leaning edge for easy cleaning. This prevents the hutch from falling over when pressure washing. Only one person required for cleaning.

GROUP HUTCHES*

Stress can be detrimental to calf health and growth. Our Group Hutches were designed to ease the transition from individual to group housing, and to make it easier for your crew to provide the best care.

Swing-Up Rear Bedding Door

makes it easier to add bedding, facilitating cleaner housing and healthier calves.

Ridge Ventilation

with a Grill Vent in the front and a Rear Top Rotary Vent you can use to control the airflow.

Molded In One Piece

for superior strength that will withstand tough conditions. Our group hutches have no seams, no rivets and no points of weakness.

Integrated Poly Skid

will not freeze to the ground the way wood skids do.

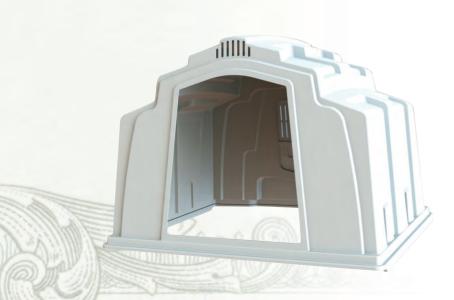

Other Great Features

include extra hutch height that accommodates longer growth periods, multiple vents for optimal ventilation and a truly opaque design.

At Agri-Plastics, we stand behind our hutches. With a 10-year limited warranty, they are the only serious choice.

* Patented

8

STANDARD FEATURES

SWING-UP REAR BEDDING DOOR

MANUAL FEED

INTEGRATED POLY SKID

REAR VENTILATION

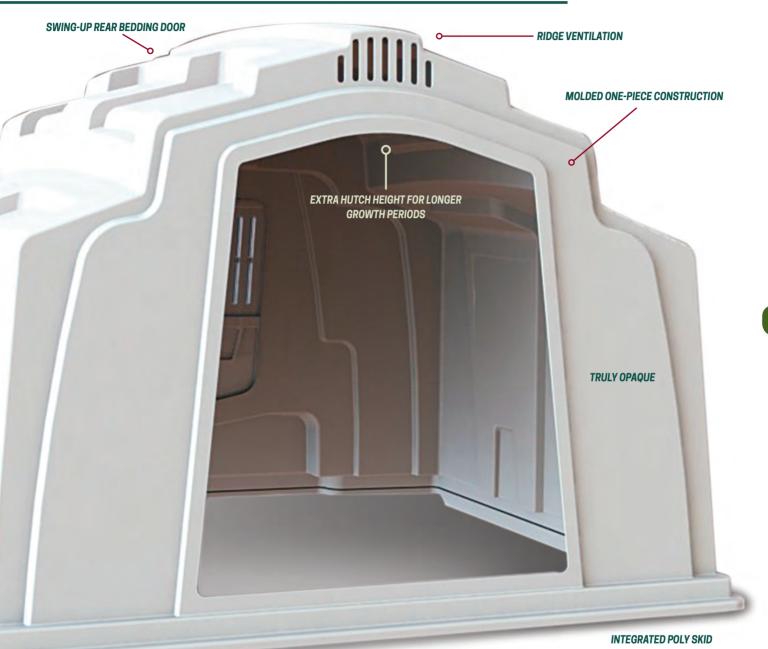

REAR TOP ROTARY VENT

Agri-Plastics Group Hutches transition weaned calves to group conditions with ease.

WHAT SETS OUR GROUP HUTCHES APART

Our group housing is designed by dairy farmers, for dairy farmers. That means our innovations come directly from the farm to solve the problems you and your crew face every day. From the strong one-piece construction and integrated poly skids to rear rotary vents and a swing-up rear bedding door, our hutches are designed to reduce stress among calves and crew members alike.

ROLLING GROUP FEEDING PENS

Efficiency, Ease and Savings

Cut down labor costs with the Rolling Group Feeding Pen-simply roll the fence back and forth to make cleaning easier and more efficient. With tough aluminum side panels and three mounted troughs, these pens are ideal for calves from 2 to 10 weeks of age. An optional Milk Bar is available to serve multiple calves at one time.

- Pen rolls back and forth for easy cleaning
- Side panels feature a tough aluminum construction
- Recommended for calves 2 to 10 weeks old
- Includes three troughs
- Optional Milk Bar available

OPTIONS:

10

Transition Pen System

Moving or disassembling group transition pens should be guick and easy. That's why Agri-Plastics designed our Transition Pen System to pin together simply at the corners. The side panels are made from aluminum to withstand tough conditions, so you don't have to sacrifice longevity for a product that's easy to use. Choose from the Standard or XL sizes to fit the needs of your herd.

Corners guickly pin together for simple disassembly and moving

TRANSITION PEN SYSTEM

PENS ROLL BACK AND FORTH FOR EASY CLEANING

XL TRANSITION PEN SYSTEM

Agri-Plastics Rolling Group Feeding Pens cut down cleaning time and labor.

WHAT SETS OUR ROLLING PENS APART

Cut down on labor requirements without short-changing your calves with our efficient rolling pens. Cleaning is fast and simple—just roll the fence back and forth to get the job done quickly while causing minimal stress to your calves.

STARTER PENS* SELECTION GUIDE

STANDARD FEATURES

Starter Pen

The Starter Pen from Agri-Plastics is designed for getting your calves off to a healthy start. These units are just for short term use before moving your calves to your Calf Hutches, larger Indoor Pens, Group Housing or Robotic Feeding set-ups.

Optional Accessories for All Starter Pen Models Include:

- Bottle holder
- Milk bottle
- Teat bucket
- Pail ring
- Starter bowl
- Bucket

Elevated Starter Pen

12 For optimal drainage, the Elevated Starter Pen is made with a slatted floor that sits above the ground on galvanized metal legs.

Movable Starter Pen

STARTER PEN

Easily change the position of the Movable Starter Pen using the two swivel wheels with brakes and two rigid wheels that are mounted directly to the slatted floor.

* Patent Pending

ELEVATED PEN

MOVABLE PEN

FRONT FEEDING

FEEDING

Agri-Plastics Starter Pens are designed to get your calves off to a healthy start.

WHAT SETS OUR STARTER PENS APART

By giving your newest calves housing designed specifically to meet their needs, you can help your calves get off to a great start. Our Starter Pens are made with slatted floors to help improve ventilation and are easy to flip to clean for proper hygiene.

FLEX-PEN* STAND-ALONE HOUSING

Stressless Transitions

Your calves are a valuable investment. Protect them from stress with the exclusive Flex-Pen System from Agri-Plastics. The system is a first in the marketplace that can transform from single to group housing—and back again—simply by detaching the side panels. This innovative, stand-alone solution allows calves to be housed individually, then grouped together when health permits.

We have two choices of Flex-Pen Systems to suit your operation. Choose from the Wire Back option that has an integrated rear bedding door for easy access and viewing of calves, or the Rear Rotary Back that has multiple airflow settings for different barn types and weather.

Additional Flexible Features include:

- Adjustable bucket heights
- Interchangeable front and rear doors
- Meets European housing standards
- Compatible with robotic feeding setups
- Molded from heavy-gauge plastic that is easy to clean and lightweight
- Reinforced steel frame inside the front panel for sturdiness

* Patent Pending

14

FLEX-PEN WIRE BACK

FLEX-PEN SYSTEM

STANDARD FEATURES

LOCK BLOCK

Agri-Plastics Flex-Pen makes transitions easier for calves and operator.

WHAT SETS OUR FLEX- PENS APART

By allowing your calves to be housed individually or in groups without stressful moves, the Flex-Pen System is made to reduce stress on your calves, so they can grow healthy and strong. Protect your investment with Agri-Plastics and its innovative stand-alone housing solution, the Flex-Pen.

DROP-IN-GO* & INDOOR PENS

You can assemble and dismantle each unit in just minutes thanks to an interlocking tongue-and-groove system for flexible adjustments to your operational setup. Mount the units back-to-back to optimize spacing of calves in cramped livestock buildings.

At Agri-Plastics, our systems are designed to keep your investments healthy with features like separate water and feed buckets that prevent contamination. The easy-to-clean, lightweight design discourages the growth of bacteria and the spread of disease. In addition, heavy-duty Front Feeding Doors are reinforced with a steel frame to withstand punishing conditions.

The system is available in standard and wire back models to protect your interests—the health of your calves.

16 Molded Calf Dividers

prevent calves from cross suckling to stop diseases from spreading through your herd.

Adjustable Front Door

grows as your calf grows for optimal calf comfort and development. Adjusts to three heights.

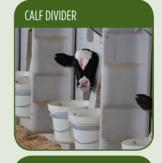

Euro-Models are available which have been designed to European standards.

* Patented and Patents Pending

STANDARD FEATURES

DROP-IN-GO PEN

DROP-IN-GO WIRE BACK PEN

Agri-Plastics Indoor Calf Pens are the flexible way to shelter your investment.

WHAT SETS OUR INDOOR PENS APART

Every operation is different, so our indoor pens offer various customizable features—from interchangeable front and rear doors on the Flex-Pen to multiple setup options on the Drop-In-Go—so you can customize pens to your operation and your calves' changing needs. Each of our indoor models is also designed for easy calf viewing, so you can keep a close eye on your investments.

HOUSING VENTILATION TUBE SYSTEMS

Proper airflow is a major concern for calves housed inside buildings, which is why we're introducing our newest product line—a series of ventilation systems for multi-season use, so you can invest in your herd's well-being year-round.

The FLIP DUCT[®] Ventilation System uses a fan located at one end of the barn to create positive pressure that pushes fresh air the entire length of the barn using a perforated tube. The patented internal membrane system features a warm weather and a cold weather side, so you can utilize the FLIP DUCT[®] all year long by simply rotating to the side you need.

The **Pre-Engineered tubes** are made to fit your barn's pen layout, so your calves receive proper ventilation - without unhealthy drafts in the winter.

Account for changing weather in a snap using the **Rotating Collar System** and variable-speed fan.

WARM WEATHER

- Variable speed fan set to HIGH
- Air flows through LARGE holes
- Showers calves with cooling comfort
- Disperses flies; keeps bedding dry

(R)

COLD WEATHER

- Variable speed fan set to LOW
- Air flows through SMALL holes
- Gently delivers slow, non-drafty fresh air to calves

18

FLIP DUCT[®] and FLAP DUCT[®] Ventilation System keeps air flowing in any structure.

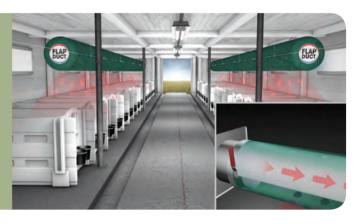

The FLAP DUCT[®] builds on the best features of the FLIP DUCT[®] Ventilation System to give producers even more control over ventilation requirements for a customized solution that shelters your biggest investment—your calves.

Agri-Plastics understands that individual setups often need individualized solutions. With FLAP DUCT[®], the patented internal membrane can be adjusted up or down to adjust the airflow based on seasonal conditions with the simple flick of a lever. This system is particularly useful during the spring and the fall, when the days are warm and the nights cool. With the membrane in the up position, high speed air showers calves during warm weather. Simply move the lever down to adjust the membrane to the bottom of the tube to deliver slow, non-drafty fresh air during cold weather. Once installed, the membranes can be moved up or down to precisely control airflow based on your herd's needs in every season.

WARM WEATHER

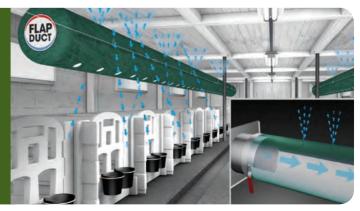

- Variable speed fan set to HIGH
- Internal membrane rests at TOP of duct
- EASY lever control: It's a breeze to adjust to changing conditions

COLD WEATHER

- Variable speed fan set to LOW
- Air flows through SMALL holes
- Gently delivers slow, non-drafty fresh air to calves

ACCESSORIES

20

Agri-Plastics calf milk trailers all have a Honda 6.5 HP engine. It has a hot dipped galvanized frame with a torsion right axle. Each unit comes standard with a digital milk flow meter that can be calibrated for accuracy. They are easy to drain and keep clean. Built for rugged use.

For all housing products.
